

Satellite Seminar: Supply Management's Role in Sustainability

Thursday, April 17, 2008

The topic of "sustainability" has leapt into corporate boardrooms, raising questions of the company's social responsibility and environmental practice, policies and decision-making. Questions find their way to supply management and challenge us to explore how our suppliers are dealing with sustainability. The program looks at sustainability elements in contract language, supplier audits, regulations, reporting requirements and compliance. It will also cover how to keep upper management informed on sustainability — and the supply manager's role in addressing these issues.

About ISM Satellite Seminars

ISM Satellite Seminars offer the perfect opportunity to keep your supply management team up to date on timely, relevant topics that directly impact the profession. Since these broadcasts are down-linked through ISM affiliates, such as your NAPM – Madison Area chapter of ISM, you can attend a satellite seminar in your local area and incur little or no travel expense. Each program is interactive and includes live question and answer segments where you can phone, fax, or e-mail your questions to the panelists.
